HOME INSPECTION REPORT – DISCLAIMER

Introduction

This Home Inspection Report ("Report") is prepared for the sole and exclusive use of the client ("Client") and is subject to the terms and conditions outlined herein. The inspection and report are conducted and prepared in accordance with industry standards and guidelines and do not constitute a warranty, guarantee, or insurance policy regarding the property's condition.

The findings and opinions expressed in this report are based on a visual, non-invasive inspection of the readily accessible components of the property at the time of the inspection.

Scope of the Inspection

The inspection is a limited visual examination of the property's major systems and components, including but not limited to the foundation, roof, plumbing, electrical, HVAC, and structural elements.

This inspection does not include destructive testing, dismantling of components, or analysis of concealed conditions. The inspector does not move furniture, lift carpets, open walls, or perform any action that may cause damage to the property.

The report provides an assessment of the property's condition on the date of inspection only. Conditions may change after the inspection, and the Client is encouraged to monitor and maintain the property accordingly.

Limitations and Exclusions

This inspection is not technically exhaustive and does not address every possible defect or condition. The following items are excluded from the scope of this inspection:

- Latent, hidden, or concealed defects
- Code compliance and building permit verification
- Environmental hazards (mold, asbestos, lead, radon, formaldehyde, etc.)
- Pest infestations (termites, rodents, etc.)
- Underground utilities, septic systems, and wells
- Specialized systems (alarm systems, intercoms, irrigation, pools, spas, etc.)
- Cosmetic issues that do not affect functionality

This report is not a substitute for specialized evaluations, engineering assessments, or other professional inspections that may be required for specific concerns.

No Warranty or Guarantee

The home inspection and report do not constitute a warranty, insurance policy, or guarantee of any kind. The inspector does not warrant or certify the future performance, longevity, or functionality of any components or systems.

The Client is advised to obtain a home warranty or insurance policy for additional protection.

Client Responsibilities

The Client is responsible for reviewing this report thoroughly and seeking further evaluation from qualified professionals for any areas of concern.

The Client acknowledges that this inspection is a limited, point-in-time assessment and does not replace regular maintenance or care of the property. The Client is encouraged to perform due diligence by reviewing past maintenance records, obtaining seller disclosures, and conducting additional inspections as necessary.

Inspector's Liability and Limitation of Claims

The liability of the inspector and inspection company is limited to the inspection fee paid. Under no circumstances shall the inspector or company be liable for consequential, incidental, or indirect damages arising from the inspection or reliance on this report.

Any claims against the inspector or company must be made in writing within 90 days of the inspection date. Failure to notify within this timeframe waives all claims by the Client.

Dispute Resolution

In the event of a dispute arising from this inspection or report, the Client agrees to first attempt resolution through direct communication with the inspector.

If resolution cannot be reached, the Client agrees to submit the dispute to binding arbitration in accordance with the rules of a recognized arbitration association.

Legal action must be initiated within one year of the inspection date. The Client waives any and all claims beyond this period.

Acknowledgment and Acceptance

By accepting this report, the Client acknowledges and agrees to the terms and limitations set forth herein. The Client further acknowledges that no warranties, express or implied, are provided.

This disclaimer forms an integral part of the home inspection process and must be read in conjunction with the full inspection report.

INSPECTION SUMMARY

MAJOR DEFECTS

Definition: Issues that compromise safety, structural integrity, or habitability.

Impact: High risk – immediate attention required.

Examples: Structural cracks, severe roof damage, major electrical or plumbing failures, significant water intrusion or mold, violations of building codes.

MINOR DEFECTS

Definition: Issues that do not pose immediate safety risks but may worsen over time.

Impact: Medium risk – repair recommended to prevent escalation.

Examples: Minor cracks, small leaks, non-uniform sealant application, inefficient but operational systems.

COSMETIC ISSUES

Definition: Surface-level issues affecting appearance only.

Impact: Low risk – does not affect safety or functionality.

Examples: Scratches, stains, minor paint touch-ups, worn finishes, cosmetic blemishes.
